

Fancy Architectural Millwork

Capability Statement

Company Overview

Fancy Architectural Millwork is a custom millwork studio specializing in high-end residential interiors. We partner with architects, interior designers, and custom builders to deliver thoughtfully crafted millwork supported by a clear, disciplined process.

As a division of Fancy Floors, our work reflects the same commitment to material quality, precision, and coordination that defines the broader Fancy brand—applied specifically to architectural millwork and custom woodwork.

Core Capabilities

Custom Residential and Commercial Millwork

- Kitchens & pantries
- Closets & dressing rooms
- Built-ins, libraries, and wall paneling
- Vanities, bars, and specialty features
- Whole-home millwork packages

Design & Technical Coordination

- Architectural shop drawings
- Designer and builder collaboration
- Material, finish, and construction consultation
- Value-engineering and scope refinement

Fabrication & Installation

- North American Architectural Woodwork Standards (NAAWB)
- Furniture-grade construction standards
- High-quality finish systems
- Coordinated fabrication schedules
- White-glove installation and final detailing

Construction Standards

- North American Architectural Woodwork Standards (NAAWB)
- Furniture-grade plywood casework
- Solid wood doors, drawer fronts, and trim components
- Premium soft-close hardware systems
- Precision joinery and alignment
- Finish systems selected for durability and longevity

All work is fabricated and installed to support both aesthetic intent and long-term performance.

Market Focus

- High-end custom residences
- Luxury renovations
- Architect- and designer-led projects
- Full-scope millwork packages

We are best suited for clients who value quality, transparency, and a structured approach to custom work.

What Sets Us Apart

- Architect-grade documentation — clear shop drawings and defined scope
- Transparent assumptions — no ambiguity around materials or inclusions
- Disciplined process — predictable timelines and coordination
- Design-forward mindset — craftsmanship that supports the architecture

Our background in precision-driven
